index.html

```
<!DOCTYPE html>
<html ng-app="userApp">
<head>
  <meta charset="UTF-8">
  <title>WTPR9 - User Management</title>
  <script
src="https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.js"></script>
  <script src="app.js"></script>
  <script src="controllers/userController.js"></script>
  <script src="services/userService.js"></script>
  <script src="directives/userCard.js"></script>
  <link rel="stylesheet" href="css/style.css">
</head>
<body ng-controller="UserController">
  <h1>User Management System</h1>
  <form ng-submit="addUser()">
    <input type="text" ng-model="newUser.name" placeholder="Name" required>
    <input type="email" ng-model="newUser.email" placeholder="Email" required>
    <input type="text" ng-model="newUser.role" placeholder="Role" required>
    <button type="submit">Add User</button>
  </form>
  <input type="text" ng-model="searchText" placeholder="Search user">
  <div ng-repeat="user in users | filter:searchText">
    <user-card info="user" on-delete="deleteUser(user)"></user-card>
  </div>
</body>
</html>
```

style.css

<pre>body { font-family: Arial, sans-serif; margin: 20px; } input { margin: 5px; padding: 8px; } button { padding: 8px 10px; background: #007BFF; color: white; border: none; cursor: pointer; }</pre>	<pre>.user-card { border: 1px solid #ccc; padding: 15px; margin-top: 10px; border-radius: 5px; }</pre>
--	--

app.js

```
angular.module('userApp', []);
```

userController.js

```
angular.module('userApp').controller('UserController', function($scope, UserService) {  
    $scope.users = UserService.getUsers();  
  
    $scope.addUser = function() {  
        if ($scope.newUser) {  
            UserService.addUser($scope.newUser);  
            $scope.newUser = {};  
        }  
    };  
  
    $scope.deleteUser = function(user) {  
        UserService.deleteUser(user);  
    };  
});
```

userService.js

```
angular.module('userApp').factory('UserService', function() {  
    var users = [  
        { name: 'Satyam', email: 'satyam@gmail.com', role: 'Developer' },  
    ];  
  
    return {  
        getUsers: function() {  
            return users;  
        },  
        addUser: function(user) {  
            users.push(user);  
        },  
        deleteUser: function(user) {  
            var index = users.indexOf(user);  
            if (index > -1) users.splice(index, 1);  
        }  
    };  
});
```

userCard.js

```
angular.module('userApp').directive('userCard', function() {  
    return {  
        restrict: 'E',  
        scope: {  
            info: '=',  
            onDelete: '&'  
        },  
        template: `  
            <div class="user-card">  
                <h3>{{ info.name }}</h3>  
                <p><strong>Email:</strong> {{ info.email }}</p>  
                <p><strong>Role:</strong> {{ info.role }}</p>  
                <button ng-click="onDelete()">Delete</button>  
            </div>  
        `,  
    };  
});
```
